

Annex J - Ecological Focus Area Map

You must submit a map with your SAF detailing the location and size of your managed EFA areas. You may wish to access 'view-only' maps to help prepare this EFA map. In the example below; the farmer has identified the areas and fields that are managed for EFA. Please note: Nitrogen fixing crops are required to be surrounded by a claimed and eligible EFA field margin and it is advised that you annotate the EFA map with the sizes of each EFA, i.e. length and width shown below:
